

WESTON | AVENTURA  
ENDODONTIC CARE

# Your Aventura Root Canal Specialists HAVE A NEW HOME

At Weston Aventura Endodontic Care, excellence isn't just an aspiration—it's the foundation of everything we do. Our team of **three highly trained endodontists, including two Board-Certified Diplomates and one Board-Eligible specialist**, is dedicated to delivering exceptional patient care while serving as a trusted clinical resource for our referring doctors.

Staying at the leading edge of endodontics means embracing innovation and lifelong learning. **Our early integration of the GentleWave® System, one of the first in South Florida**, is just one example of how we incorporate meaningful advancements that improve the quality of care. This advanced system uses multisonic technology and fluid dynamics to thoroughly clean and disinfect the entire root canal system, including complex anatomies that are often missed by traditional instrumentation. This philosophy of intentional, **patient-centered innovation** continues to guide our practice.

Our expertise spans the full scope of advanced endodontic treatment, including **complex endo-restorative cases, surgical endodontics, pediatric care, and sedation dentistry**. Whether managing a challenging referral or collaborating on treatment planning, our goal is to make each case feel like a seamless extension of your own high standard of care.

Just as important as our clinical skills is the experience we provide at every step. From the first call to the welcome at the front desk, through treatment and follow-up, we have built a team that excels in clear, thoughtful communication while truly engaging with patients on a very human level.

**This month, we're proud to announce the opening of our new, purpose-built Aventura location.** Designed with both patient comfort and professional collaboration in mind, the facility features a **dedicated conference space** for continuing education, case discussions, and interdisciplinary learning.

At Weston Aventura Endodontic Care, we strive to be more than a treatment provider. We aim to be a partner in clinical excellence, working alongside you to deliver the very best for every patient you serve. We look forward to **welcoming you to our new space** and continuing to grow together through shared knowledge and exceptional care.

Find us at our  
**New location**  
in Aventura.

# Dr. Mark Limosani

I'm proud to share that I recently became a **Fellow of the International Academy of Endodontics** during their annual meeting in Manchester. This recognition reflects years of dedication to advancing my skills and contributing to the profession on an international level. For me, it represents more than a title—it's a reaffirmation of my commitment to clinical excellence, innovation, and lifelong learning.

I've been passionate about how **CBCT imaging, microscope-based treatment, and advanced irrigation technologies combine** to achieve more conservative, longer-lasting treatments. By preserving more of a tooth's natural structure, we improve long-term prognosis and patient outcomes.

I'm honored to share these approaches at my upcoming lectures for the **West Coast District Dental Society** in Naples, FL on Sunday, August 24th, and the **Florida Association of Endodontists** in Orlando on Saturday, September 20th, 2025. **As President-Elect of the FAE**, I look forward to curating an engaging and forward-thinking program for the 2026 meeting.

I'm currently pursuing my **Mastership in Biomimetic Dentistry**, a discipline focused on restoring teeth to mimic their natural properties. I'm eager to apply these principles across our practice to ensure care that's both technologically advanced and biologically respectful.

This past year, my focus has been developing our **purpose-built Aventura facility**. Inspired by our Weston office, the new location features its own **ocean theme** to create a serene patient atmosphere. It will also serve as a hub for professional education with Dr. Tink and Dr. Leiva, offering training for dentists, specialists, and their teams, and extending outreach to the broader medical community. Our ability to provide **in-house moderate and deep sedation services** ensures even the most anxious patients can receive advanced care in comfort.

**Outside of work, my most important role is raising my three boys with my wife, Valentina, in Hollywood Lakes. Together, through her bilingual podcast Mamas Con Ganas, we share uplifting, growth-focused content to inspire the Latin community and beyond.**

# Dr. Lauren Tink

I'm honored to have recently earned board certification as a **Diplomate of the American Board of Endodontics**. This multi-year process includes a written exam, an oral exam, and the submission of complex clinical cases I've personally treated. Board certification is a voluntary achievement **held by fewer than 30% of endodontists in the United States**.

This achievement reflects my dedication to delivering the highest standard of care, embracing growth, and continually expanding my knowledge.

**Starting this month, I'll begin seeing patients at our new Aventura location, while continuing to provide care at our Weston office.** I look forward to expanding access to quality care and strengthening our collaboration with valued referring partners across South Florida.

Beyond my clinical work, I've had the unique opportunity to participate in several **veterinary dental missions**, providing care for rescued exotic animals—including **chimpanzees, bears, and tigers**. These animals were rescued from environments where they were kept in poor conditions.

They often arrive at sanctuaries with serious dental issues caused by stress behaviors like cage biting, which frequently lead to fractured or infected teeth. Once in the care of sanctuaries dedicated to their long-term health, these animals finally receive the medical attention they deserve.

Working alongside teams of veterinary specialists, I've performed endodontic therapy, restorations, extractions—and even an apicoectomy on a chimpanzee. **Helping these animals find relief from pain and restoring their comfort and function has been incredibly meaningful.**

It's a privilege to use my training to treat such majestic and vulnerable creatures. I'm grateful to be part of a profession that makes an **impact far beyond traditional dental settings**.

When I'm not practicing endodontics, I love traveling and spending time outdoors with my husband, Andrew. We share a passion for hiking, snorkeling, and exploring national parks, and we're always looking for our next adventure.

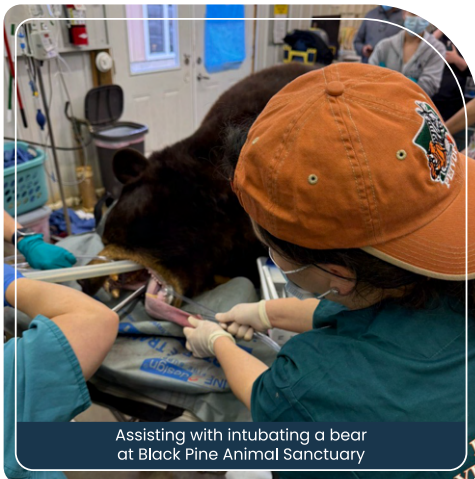

**Thank you for your continued trust and collaboration. I look forward to continuing to provide exceptional care at both our Aventura and Weston offices.**

# Dr. Karina Leiva

I'm Dr. Karina Leiva, the newest addition to our group. I'm an endodontist and a proud mom of a 9-year-old girl and a 15-month-old boy, striving every day to balance both roles with passion and dedication.

One of my greatest joys is seeing others succeed. This inspired me to join Nova Southeastern University as an adjunct faculty member in both the pre-doctoral and post-graduate programs.

Teaching not only allows me to share my knowledge with students, but also keeps me current with the latest scientific evidence in endodontics.

In our practice, I welcome challenging cases, finding my greatest reward in relieving pain and restoring smiles. One memorable case involved a 10-year-old hockey player who fractured teeth #8 and #9.

His father brought the broken fragments, and through vital pulp therapy and precise reattachment, we restored his smile with minimal post-operative discomfort—sending a happy, pain-free child back to the rink. I treat every patient, especially children, with the same care and attention I would give my own family.
